

cut-out having a height dimension between said selvedge line and said lower rim, said elastic band having a width dimension approximately equal to said height dimension, said elastic band having an upper rim sewed to said headdress at said selvedge line, said elastic band having a lower rim sewed to said headdress at a front of said headdress.

12. (new) An article comprising:

a headdress having a visor extending therefrom, said headdress having at least one cut-out extending over at least a portion of a periphery thereof, said headdress having a lower rim, said cut-out being a semi-crescent extending from said lower rim to a summit of said headdress;

an elastic band extending along an entire periphery of said headdress; and

an elastic member being cooperative with said headdress at said cut-out so as to be visible from an exterior of said headdress at said cut-out, said elastic member having one side sewed to said headdress at one side of said cut-out, said elastic member having another side sewed to said headdress at an opposite side of said cut-out, said elastic member extending from said summit to said lower rim, said elastic band positioned inwardly of said elastic member interior of said headdress.

13. (new) The article of Claim 11, said headdress comprised of an inextensible fabric.

14. (new) the article of Claim 11, said headdress having a generally semi-spherical shape and formed of sewn-together pieces of fabric.

15. (new) The article of Claim 11, said headdress having a band shape.

16. (new) The article of Claim 11, said visor being of a generally rigid panel of material covered with a fabric.
